## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to an embedded electroconductive layer, classified in class 257, subclass 751.
  - II. Claims 8, 10, 12-16, and 31-37, drawn to a method for the formation of an embedded electroconductive layer, classified in class 438, subclass 637.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the embedded conductive layer in the invention of Group I can be formed by selectively depositing within the opening part or within the depressed part in the insulating film on the substrate, the barrier layer, the metal growth promoting layer, and the electroconductive layer, thereby eliminating the need for depositing conductive layer and then removing unwanted parts of the barrier layer, the metal growth promoting layer, and the electroconductive layer. Thus it has been shown that the product as claimed in the invention of Group I can be made by another and materially different process than that which is claimed within the method of the invention of Group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2823

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

*Conclusion*

4. Paper related to this application may be submitted directly to Art Unit 2823 by facsimile transmission. Papers should be faxed to Art Unit 2823 via the Art Unit 2823 Fax Center located in Crystal Plaza 4, room 4C23.
